Specs/General Info:

For inground, spas, and water features

Operates between 1100-3450 RPM

2" NPT suction/discharge ports

Totally-enclosed fan-cooled (TEFC) design with built-in diagnostics for long service life

Adjusts to maintain optimal flow rates for more energy savings

Built-in settings protect pump from common premature failures

User friendly control panel w/ LCD

3 HP motor with variable speed capability, allowing for optimized, lower-speed operation

Allows programming for four different speeds for different pool, spa or water features applications

Offers ultra-quiet operation just 7 - 10 decibels or half a human whisper

Operates at the minimum speed required for unmatched longevity

Compatible with other pool systems, including EasyTouch, IntelliTouch, and SunTouch

Compliant Virginia Graeme Baker Act, includes a safety vacuum release system that can't be disabled
